SKILLS

Python, Javascript, CSS, HTML, Adobe PhotoShop, Adobe XD, Wordpress, Elementor, Figma, Empathy, Adaptability, Time Management, Teamwork, Communication, Problem-Solving

PROJECTS

Portfolio Website HTML, CSS, Javascript

[My Website](#)

- Developed a personal portfolio website using a Figma low-fidelity prototype, HTML, CSS, JavaScript, and the EmailJS library, showcasing various projects and skills.
- Utilized CSS Grid and Flexbox to create a responsive design that adapts to different screen sizes.
- Implemented JavaScript to add dynamic functionality such as mobile navigation bar and a contact form.
- Deployed through Github Pages, allowing for easy collaboration and version control

FlashCard Memerizer Python

[GitHub](#)

- Utilized advanced data structures, such as lists and dictionaries, to create a data sifter tool that reorganizes information into a clear and organized format.
- Imported and sifted through data from external documents to effectively utilize information
- Incorporated the random library to randomly present terms and definitions, enhancing the user's learning experience
- Developed a quiz feature that follows Ebbinghaus' fundamental memory curve principles, ensuring optimal retention and recall of information.
