EXPERIENCE

Web Development and UI Design Intern, CyberDome USA — Atlanta, GA   June 2022 - Present

- Created a responsive website utilizing HTML, CSS, WordPress, and Elementor, complete with a Figma low-fidelity prototype, enabling customers to easily navigate and discover services offered.
- Designed a visually appealing logo using PhotoShop that effectively conveyed the company's values.
- Collaborated with executives to design and update other websites under the Dhvaj company.

EXTRACURRICULARS

Girls Who Code Club Member — Atlanta, GA   August 2022 - Present

- Attended various events Google and other tech companies to gain insights and knowledge about the industry.
- Participated in career fairs and interview seminars to network with professionals.
- Completed in a weekly UI/UX bootcamp to further enhance skills for professional application.

PROJECTS

UGA Hacks 8: Travel Tender Flask, Python, Javascript, SQL, Figma, HTML, CSS   GitHub

- Developed and maintained the backend of web application using Flask, Python, and MyPhpAdmin, focusing on critical features such as user authentication and authorization through the login page.
- Incorporated BootStrap library to ensure a responsive design.
- Implemented Flask HTTP methods, including GET and POST, to handle communication between the server and client side, ensuring seamless data exchange.
- Implemented database connectivity, using SQLAlchemy and MyPhpAdmin, to store and retrieve user data, enabling secure and efficient data management.

Portfolio Website HTML, CSS, Javascript   My Website

- Developed a personal portfolio website using a Figma low-fidelity prototype, HTML, CSS, JavaScript, and the EmailJS library, showcasing various projects and skills.
- Utilized CSS Grid and Flexbox to create a responsive design that adapts to different screen sizes.
- Implemented JavaScript to add dynamic functionality such as mobile navigation bar and a contact form.
- Deployed through Github Pages, allowing for easy collaboration and version control
